How to Make Authenticity Your Secret Weapon to Success

Everybody's talking about how important it is to "Bring your whole self to work." or about the importance of Authentic Leadership. But much of the talk is unfortunately not much more substantive than fluffy unicorn doo-doo.

Erin however has taken authenticity from doo-doo and made it into a tangible set of behaviors and actions, which when practiced will both make your work life a heck of a lot better plus lead to tremendous results. Using her framework, "The Six Principles of Strategic Authenticity" (H.U.M.A.N.S.), Erin's talk will have your audience taking immediate, tangible steps towards modernizing their culture, maximizing their career, and making a lot more moola!
