KEYNOTES INCLUDE:

### Cybersecurity: Spies, Lies, Cybercrime, and You

Dive headfirst into the battleground where foreign spies, deepfakes, and Dark Web criminals conspire to steal from you. Today's adversaries are relentless and cunning. They're exploiting every vulnerability, deploying an arsenal of generative AI bots and bandits. As we hurtle towards the future, cybertheft will take over \$20 trillion USD from organizations just like yours. Join cybersecurity expert and legendary FBI spy hunter Eric O'Neill in this unexpected presentation. With fresh stories that read like a thriller, Eric teaches you to **think like a spy catcher** and win.

### Secrets from a Legendary Spyhunter: Decoding AI Deepfakes, Extortion & More

AI-generated voices, texts, and images pose a grave threat to national security—and to you. The latest jaw-dropping stories include kidnapping calls to parents who hear their child's wrenching cries for help. Elaborate video conferences that dupe teams into funding projects by bad actors. Ransomware from cyber-extortionists who hold your data hostage. In a world where technology drives our lives, you must take new steps to protect yourself and your organization. With his characteristic wit and storytelling, cybersecurity expert and legendary spyhunter Eric O'Neill tells you how to identify AI-fueled attacks...and **stop them from taking your money.**
