

Speaker AV Requirements – Angela Gargano

To ensure a smooth and engaging presentation, please provide the following AV setup:

- **Wireless headset microphone** (preferred over handheld for mobility)
- **Confidence monitor** (to view speaker notes and track timing)
- **Clicker/presenter remote** (for slide control)
- **Screen(s)/projector** for slideshow display (visible to audience)
- **HDMI or USB-C input** for personal laptop connection (if using my own)
- **Access to sound system** (for any audio/video embedded in slides)
- **AV technician onsite** (if possible, for setup and troubleshooting)

Let me know if there's a slide format or tech check time you'd prefer ahead of the event!
